

CU Robotics Team

2026-27 Sponsorship Packet

Why sponsor the CU Robotics Team?

- **Recruit:** 60+ highly capable and motivated student engineers across mechanical, software, and electrical disciplines
- **Media:** CU Robotics Team instagram and other social media
- **Tax Deductible:** CU Robotics Team 501(c)(3) non-profit

Contact: curobotics@colorado.edu
(720) 607-1421

The Team

The Organization

The CU Boulder Robotics Team is a student-run engineering club at the University of Colorado Boulder. Our mission is to develop industrial-grade robots at the highest level of collegiate robotics. All sponsorship **donations to our team are tax deductible under 501(c)(3).** Each competitive season (Fall-Summer), we build a fleet of robots to enter the ARC Robotics Championship. Through our student-run program, we promote real-world skills in mechanical design, manufacturing, software development, PCB design, and business administration. We follow industry-standard engineering processes, including mechanical design reviews, software CI/CD, and manufacturing analysis.

The Members

CU Robotics is where students go to work with embedded systems and robotics. We've grown to a team of over sixty members and have cemented our place as one of CU Boulder's most coveted clubs. Dozens of engineers have their first large-scale team experience at CU Robotics every year. Academic majors of members include Computer Science, Electrical, Mechanical, and Aerospace Engineering.

The Skills

Our members develop a wide range of skills, including:

- *Electrical Engineering:* Circuit analysis, schematic and layout design (Fusion 360), and PCB assembly
- *Software:* Computer vision, localization and mapping, multithreaded design, C, C++, Python, Rust, embedded systems, Git with CI/CD, shell scripting, and control theory
- *Design and Manufacturing:* Onshape CAD, FEA, iterative development, CAM, composite manufacturing, and 3D printing

The Robots

ARC Robotics/RoboMaster

A king of the hill type game which combines aspects of paintball and battlebots, ARC Robotics challenges teams to build a fleet of robots to compete in a dynamic and demanding 3v3 competition. Each robot serves a unique role and is designed with a focus on quality, with every aspect being held to standards found in real world products. All our robots also contain fully autonomous capabilities, granting an edge in reaction time and accuracy over human driven competitors. The long term goal of CU Robotics is to compete in the RoboMaster University Championship, hosted exclusively in China, which expands the format to 7v7, including a drone.

Projects

- Custom robotics software platform for controls and commands
- Custom microcontroller firmware for sensor and actuator interfacing
- High-performance machine learning based model for target recognition
- Advanced machining with high-precision, multi-operation parts
- Highly optimized mechanical design of 500+ part robots
- Multiple power and communication PCBs on every robot

Sponsorship Tiers

Backer - \$500

- Logo on CU Robotics website
- Tour of CU Robotics during any team meeting on the Boulder Campus

Supporter - \$2000

All Backer perks, plus

- Personal thank you on CU Robotics social media
- Team member resumes made available upon request
- Direct support to help you find candidates
- Your logo on the team shirt
- Personal career fair at team meeting

Sponsor - \$5000 (Limit 3)

All Supporter perks, plus

- Direct access to team email list with 60+ members
- Company logo on all CU Robotics robots for 2026-27 season
- Company logo on all CU Robotics banners and marketing materials, including our popular robot display on the CU campus
- Option to use custom display space on CU Robotics website

<https://curobotics.net/>

Donation Process

- 1) Determine Sponsorship Tier
- 2) Determine transfer options from below
 - a) Check
 - b) Wire transfer
 - c) PayPal
- 3) Include your donation on your Schedule A or 1120 tax form for a deduction! CU Robotics will provide a written acknowledgment with the information required on Schedule A.

INQUIRES: For donation inquiries contact curobotics@colorado.edu or mobile: (720) 607-1421. Donations to CU Robotics are tax deductible under 501(c)(3). Perks apply during the 2026-27 season (August 2026 – July 2027).
